# **Flappy Parrot**

### Introduction

In this project we'll make our own version of the highly popular mobile game Flappy Bird. This project requires Scratch 2.0.

Press the space bar to flap and try to navigate through the gaps in the pipes!

# **Step 1: Make Flappy fall**

#### **Activity Checklist**

1.	Start a new Scratch project. Delete the cat by right-clicking it	
	and selecting Delete	
2.	Replace the background with an outdoor landscape. desert is a	
	good choice.	
3.	Add the Flappy character. You'll need a sprite with costumes	
	for wings up and wings down. parrot is a good choice.	
4.	Change the name of your sprite to Flappy.	
5.	Give Flappy the following script:	

when / clicked
go to x: -50 y: 0
forever
change y by -3

#### Test Your Project

Click the green flag, does Flappy start in the middle of the screen and then fall to the bottom?

Save your project

# **Step 2: Make Flappy fly**

Next, we want Flappy to flap upwards when you press the space bar.

- 1. Click on the Costumes tab and name the costumes wings up and wings down.
- 2. Now switch back to the Scripts tab and add this script:

```
when space ▼ key pressed

switch costume to wings down ▼

repeat 10

change y by 6

switch costume to wings up ▼

repeat 10

change y by 6
```

Click the green flag, are you able to control Flappy with the space bar? Do you notice that sometimes you press the space bar but Flappy doesn't move? We'll fix that next...

# **Step 3: Fix the controls**

We'd like Flappy to respond every time we press the space bar. But when we push the space bar Flappy begins two loops of movements. If we push the space bar again before these loops have finished, Scratch ignores the second press. To solve this, we'll use a variable to count up how many flaps we need to do.

1.	Disconnect the blocks under the when space key pressed and put	
	them to the side (we'll use them in a few moments.)	
$\sim$	AA also a consequence database and a subsequence	

- 2. Make a new variable For this sprite only and call it flaps.
- 3. Add the following script by draging in the blocks you put aside:

```
when clicked

set flaps to 0

switch costume to wings up v

forever

repeat until flaps = 0

change flaps v by -1

switch costume to wings down v

repeat 10

change y by 6

switch costume to wings up v

repeat 10

change y by 6
```

4. Finally, add to your when space key pressed event:

## **I** Test Your Project

Click the green flag, does Flappy now flap once for each time you press the space bar?

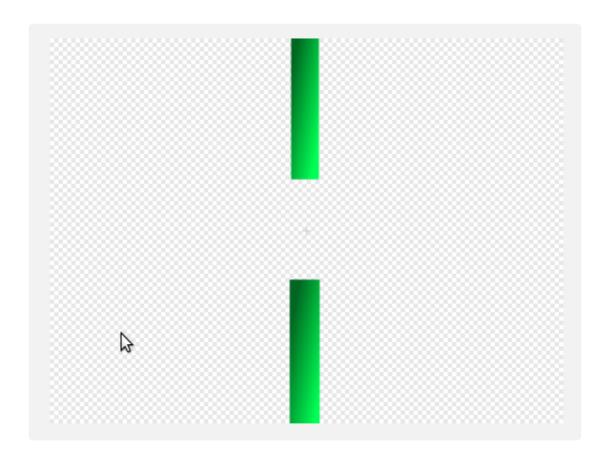

# **Step 4: Add the pipes**

Next we'll add some obstacles for Flappy to fly through.

The intrinst entremains		Activity	Checklist
-------------------------	--	----------	-----------

1.	Click on the Paint new sprite button.	
2.	Name your costume pipe.	
3.	If the costume is in Bitmap Mode click on the Convert to vector	
	button.	
4.	Click on the zoom - so that you can see the entire drawing	
	area.	
5.	Click on the Rectangle, pick a colour, and click on the Filled rectangle	
	button.	
6.	Click and drag two boxes, one from the top middle and one	
	from the bottom middle as shown:	

1.	You can shade your pipes by clicking on the Color a shape button	
	and click on the Horizontal gradient button. Choose two shades of	
	the same colour one for the foreground and one for the	
	background. When you click to fill the shapes, the colours will	
	fade between your chosen colours.	
2.	Name your sprite Pipe.	
	Save your project	

# **Step 5:** Make the pipes move

Next we'll make the pipes move and arrange them randomly to provide an obstacle course for Flappy.

# Activity Checklist

- 1. Click on your Pipe sprite and select the scripts tab.
- 2. Add the following scripts:

```
when / clicked
hide
set size to 200 %
forever

create clone of myself ▼
wait 2 secs

when I start as a clone
go to x: 240 y: pick random -80 to 80
show
repeat 120
change x by -4
delete this clone
```

Click the green flag, do pipes appear with gaps to fly through at different heights? If you find it difficult to navigate Flappy through the pipes without touching them, you can make the gap bigger in the pipe sprite by editing the costume.

## **Step 6:** Detect collision with the pipes

To make the game a challenge, the player needs to guide Flappy through the gaps without touching the pipes or the edges of the screen. Now we'll add some blocks to detect if Flappy hits something.

1.	Let's add a sound to play when Flappy collides. Click on the	
	Flappy sprite then on the sounds tab.	
2.	Click the Choose sound from library button.	
3.	Pick a collision sound for Flappy. The screech sound is good.	
4.	Now click back on the scripts tab.	
5.	Add the following script:	

```
when clicked

wait until touching edge ? or touching Pipe ?

play sound screech v

say Game Over!

broadcast GameOver v

stop other scripts in sprite v
```

6. Click on the Pipe sprite and add a script:

```
when I receive GameOver ▼
stop other scripts in sprite ▼
```

#### Test Your Project

Click the green flag, does the game end when Flappy touches a pipe or the edge of the screen?

# **Step 7: Add scoring**

The player should score a point every time Flappy makes it though a pipe. Let's

#### **Activity Checklist**

1.	Let's add a sound to play when Flappy scores a point. Click on	
	the Pipe sprite add a score sound. bird is a good choice.	
2.	Now click back on the scripts tab.	
3.	Make a new variable For all sprites and call it score.	
4.	Add a block to set the score to 0 when the flag is clicked.	
5.	Add the following block:	

```
when I start as a clone

wait until x position < x position of Flappy

change score by 1

play sound bird
```

### Test Your Project

Click the green flag, does the player score points for flying Flappy through the pipes?

#### Save your project

### Things to try

Thow many ways can you make mis game easier	OI
harder?	
Well done you've finished the basic game. There	are more
things you can do to your game though. Have a	go at
these challenges!	

Challenge 1: add a high score
Make a new variable and tick the Cloud variable (stored on server) box.
Call the variable hi-score
when the game is over check if you need to set a new high
score:
when I receive GameOver ▼  if score > hi-score then  set hi-score ▼ to score  stop other scripts in sprite ▼

Click the green flag, does your score update the hi-score?

### Challenge 2: add gravity

When something falls under gravity it doesn't usually fall at a fixed rate. For this challenge we will make Flappy fall as if under gravity.

- Add a new variable For this sprite only to Flappy and call it rise.
- Change Flappy's falling script:

```
when 🦰 clicked
                         set rise ▼ to 0
                         go to x: (-50) y: (0)
                           change y by rise
                           change rise ▼ by -0.4
And change Flappy's flapping script:
                  when Pclicked
                  set flaps ▼ to 0
                  switch costume to wings up ▼
                  forever
                    repeat until (flaps = 0
                      change flaps ▼ by -1
                       switch costume to wings down ▼
                       change rise ▼ by 8
                       wait (0.2) secs
                       switch costume to wings up ▼
                       wait 0.2 secs
```

Click the green flag, does Flappy now accelerate when falling and flapping?

#### Challenge 3: fall off screen

When the player loses make Flappy fall off the bottom of the screen before ending the game.

```
Replace the broadcast GameOver block with broadcast Fall

Now add the following scripts:

when I receive Fall

repeat 10

turn of degrees

when I receive Fall

repeat until (y position < -180)

change y by rise

change rise v by -0.4

hide

broadcast GameOver v

Don't forget to add a show block and reset Flappy's direction when the game restarts.
```

Click the green flag, does Flappy now fall off the screen after hitting a pipe? Does Flappy reappear in the correct orientation when restarting the game.

Well done, you've finished! Now you can enjoy your game!

Don't forget you can share your game with all your friends and family by clicking on Share on the menu bar!
